“AMATEUR RADIO AND THE INTERNET”

Wednesday 31 March 1998
Ragchew and Fleamarket: 19:30
Club meeting: 20:00

St. Thomas Anglican Church, Corner Somerled and Rosedale
(Please use side entrance off Rosedale)

While we often talk of the internet taking away from interest in Amateur Radio, it can also complement our hobby offering sources of information on a variety of topics. This month we'll discuss web sites which offer useful information on Amateur Radio and also the general topic of packet radio gateways and their role. While Jim Hay, VE2VE, will discuss some of the sites he is aware of bring along your ideas to share with other members.

A WORD FROM THE PRESIDENT

Hello,

Spring is around the corner and the snow is starting to disappear. We'll be able to start thinking about outdoor projects again and store the winter clothing for another year.

The flea market is coming along. Thanks to the diligent work of Fred Hart, VE2LSQ, we have a new location following the closing of the Bingo Cote des Neiges. The location is easy to get to and there is parking. We have reduced the price for tables to reflect the fact that they are five feet long instead of the usual eight. If you are interested in a table please

let me know and talk to your friends.

We are making progress with the move of VE2BG to Pointe Claire. I have seen the site and we are currently working out the best method of coupling the repeater to the existing antenna. I hope that we'll have this taken care of before long and that there will be a revitalized VE2BG on the air before long.

Club Website: <http://www.marc.qc.ca>

Repeaters

VE2BG 147.06 MHz (+)

Owned by the Montreal Amateur Radio Club and operated on the Club's behalf by the Amateur Radio Club of McGill University. Located on the McGill University Campus.

VE2RED 147.27 MHz (+)

Owned and operated by the Montreal Amateur Radio Club. Located near Decarie and Cote St. Luc Road.

The repeaters are open to all amateurs and VE2RED also offers a phone patch available to all amateurs during the day and evening.

Meetings of the Board of Directors

Meetings of the Board of Directors are open to any member to attend. Board meetings are held the first Wednesday of the month (Sept. to June) at 7:30 PM at the Montreal Association for the Blind, 7000 Sherbrooke St West. Should you wish to attend one of the meetings you are welcome. Just speak to one of the directors before-hand to make certain that the meeting has neither been cancelled, nor the location changed.

The MarcOgram is published nine times per year on the second to last Wednesday of September through June, excepting December by the Montreal Amateur Radio Club. Advertising and copy deadline is one week prior to publication.

Editor:

Craig Brander, VE2YGK craigyul@total.net 514-488-5109

Annual fees are:

General Members	\$23.00
Associate Members	\$23.00
White Cane Members...	\$10.00
Family Members (per family)	\$28.00

The membership year runs from September 1 to August 31. Memberships received on or after June 1 commence immediately and extend through the subsequent membership year - covering a period of up to fifteen months.

Articles published in the MarcOgram may be reproduced providing credit is given to the original author and the Montreal Amateur Radio Club as the source.

The opinions expressed herein are, unless otherwise stated, solely those of the authors concerned, and not those of the Club, the Directors or members and do not represent the policy of the Club.

George, VE2GW

As you can probably tell I haven't got a lot to say this month so rather than put you to sleep I'll let you continue to the rest of this issue.

I look forward to seeing you all at the meeting.

73 de Jim, VE2VE

- . . . -

MESSAGE FROM THE EDITOR

There are a couple of important announcements in this issue of the Marcogram. As mentioned elsewhere in we have a new site for the MARC hamfest. Fred, VE2LSQ has found an excellent site at the Lasalle branch of the Canadian Legion. I encourage you all to promote this event to make it as successful as possible. We still have some table space available. So if you have some surplus equipment to get rid of, or know of anybody who does why not get a table or two. We also need a good turnout at the event. So spread the word and encourage your friends to come with you or meet you at the hamfest. This is also a good occasion to introduce non-hams to the hobby of amateur radio. See the ad on page 9 for more details.

Steven Faguy, VA2SMF, has taken the initiative and started a Computer Net on Thursday evenings at 7pm on the VE2RED repeater, (see Steven's article on pages 6 & 7 for more details.) I encourage you all to support and encourage this project. It has the benefit of encouraging use of the repeater as well as possibly being a recruiting tool for bringing new members into amateur radio. Steven will take questions by e-mail and if we get enough regulars on this net perhaps a gateway for scanner users can be set-up. With the merging of technologies the hobbies of amateur radio and computing can compliment each other and be a window into the fascinating world of digital communications. Remember we need your active participation and discussions to make this a success.

This month's meeting, "Amateur Radio and the Internet" looks to be an interesting meeting. Hopefully my work schedule will allow me attend this meeting.

73 de Craig, VE2YGK

Kahnawake Peace Keepers			632-6505

These numbers are for emergencies ONLY

CONTEST CALENDAR

This year the WPX rules have been changed so that contacts with ones own country count 1 point rather than zero. This makes it necessary, if you use computer logging, to use updated software. At this writing K1EA's "CT" version 9.39 has been revised to reflect this change.

Note that the VHF/UHF Spring Sprints have been dropped by the ARRL. Here are reminders of some contests coming up. Rules for these can be found in QST or CQ magazines or on the internet. If you need rules ore more info on a contest please get in touch with me by telephone or e-mail.

It is not necessary to be "in the contest" to work a contest station and it is not necessary to submit a log unless you want to see your results in QST, CQ or The Canadian Amateur, etc.

INDUSTRY CANADA REQUEST

This notice was received too late to get in the last Marcogram. If you recently received this type of notice from Industry Canada please return it is right away. I was a recent recipient of such a letter and had to send it off right away, (the deadline being 19 March 1999). This following information comes from RAC Bulletin 99-012E and was dated 18 February 1999.

Subject: INDUSTRY CANADA TO VERIFY AMATEUR RADIO DATA BASE INFORMATION

Industry Canada utilizes multiple databases to manage the authorization of amateur radio operators. As a result, there currently is no automated method for matching the qualifications of an amateur operator with a specific call sign assignment. Part of the enhancement work being done by RAC in the ongoing maintenance of the official Amateur Call Sign Data Base on the Internet, consists of electronically merging the records from the Industry Canada data bases to obtain as great a match as possible between call signs and certificate qualifications. RAC has completed their work on this task. However, due to variations in the initial entry of names of Amateurs in the current data bases, approximately 29% of the records remain unmatched.

In order to complete this matching process and ensure that the data base will accurately reflect Amateur qualifications, Industry Canada will soon be requesting information from Amateurs. This will be done as a mail out to these Amateurs whose records could not be electronically matched. Industry Canada will be requesting the confirmation of vital information, such as date of birth and telephone number. In respect of individuals' privacy, it is important to point out that this type of personal information is strictly for facilitating the matching process. It will be treated as confidential and will not be made available when the new data base is released on the Internet.

When completed this new information will be made available to Amateurs via the RAC Internet Call Sign Data Base web page. The availability of a public data base for

Amateurs that accurately reflects call sign and certificate qualification information is of significant value to the amateur radio community. Therefore Industry Canada and RAC ask those Amateurs who receive a letter to respond quickly and positively to this request for matching information in order to facilitate the process.

NEWS FROM THE RAC QUEBEC SECTION MANAGER

I am very happy to announce some appointments to you:

Jim VE2VE, ASM (Club Relations); Jim has agreed to be my right hand man and help me with the direction that we should be taking the Quebec section. He is well known by all of you and I am very happy that he as agreed to take this position. I think he will be a major asset!

Bruno VE2VK, ASM (Technical Adviser); Bruno has agreed to give our Quebec members a hand with any and all technical questions they may have. He has a major technical background and will be also a great asset.

Michel VE2TRV, BM (Bulletin Manager); Michel has been helping AMSAT locally for many years by translating the AMSAT bulletin to French on packet. We hope to expand this with ARRL bulletins and also use Michel for a section news bulletin that I will use to keep members up to date!

Jean VE2ED (Interim STM); Jean as agreed to give us a hand with the STM position, which he had held for years before, until we can get someone to fill the position permanently. He suffered heavy damage to his station during the ice storm. I have asked a group of volunteers from the Club Radio Amateur Laval Laurentide to see if they could help Jean with the work that needs to be done on his station.

73 de Richard G. Desaulniers, VE2DX
RAC Quebec Section Manager

- . . . -

H. T. BLUES

I want to let you know of some of the problems or dangers you might face when you carry your hand held

transceiver in public. So you will not have any bad surprises as I have had in the past, here are my stories.

Episode 1

I was visiting a fellow "ham," chatting away and listening to the scanner when we overheard that there was a fire about two blocks down. Time flew by, the fire was put out, and firefighters had left the scene. A bit later I took a walk to go to the store. Using my "H.T." to do a "QSO" in simplex with my friend as I passed in front of the burned out site. I described it to my friend and I ended up by hearing tires screech and in within 2 seconds, two cops with their hands on their guns were in front of me asking me to shut my radio and to put my hands on the hood of their car. While being searched and interrogated, I try to explain to them that I was visiting and just talking to my friend. They then asked me to call back my friend. After contact was made I lent my radio to one of the officers. He then asked a few questions for my friend, first and last name, date of birth, and address. Take a guess. They went for a visit of their own. Thank god my friend was "WELL" known by most of the fire departments around the island. We later found out that there was a lot of intentional fires set in the district and the people who were doing it were communicating by radio.

Episode 2

I was just taking a walk at night, and I got pulled over by a patrol car. They asked me where I came from and where I was going. At the same time they noticed my "H.T." sticking out of my jacket. So they asked me if it was a scanner. I tried to tell them that it was an amateur radio. As a joke one of them takes the radio and made ready as if to make a "QSO" and asked his partner if he could hear him. Thank god the battery was dead.

No damage was done, but you surely stand there puzzled.

So be warned it's not every police officer who knows about amateur radio. I do not think that this is the reason to be blamed, but rather because in a lot of organized crimes there was often a scanner found after the bust. I know some "cops" who are "hams" ...

73 de Normand Pitre, VE2NHK

NEW CANADIAN PREFIX

With the creation of the Nunavut Territory on 01 April 1999 the prefix VY0 (Victor Yankee Zero) will be assigned to designate stations from this territory. Prefix VE8 (Victor Echo Eight) will remain in use for the western Northwest Territories. For those of you who participate in contests VY0 will become a separate multiplier for RAC contests., (starting with Canada Day, 01 July 1999).

- . . . -

RAC - MORSE CODE BULLETINS

Radio Amateurs of Canada now has an experimental web page which contains RAC News Bulletins in Morse Code in the midi format. Besides having a modem to connect to the Internet your computer will require a sound card and software capable of playing the midi file format. The speed of your modem and link will determine how long the files take to load.

These bulletins could be used for code practice as well. The following messages are currently available:

<http://www.rac.ca/cwnews.htm>

Beginner (5 words per minute)

ITU discussing fees for amateur satellites

Advanced Operator (15 wpm)

Out of band emission limits for Amateur Radio

Experienced Operator (25 wpm)

Nunavut Section Bulletin
Professional (30 wpm)

Contest news Bulletin

Expert (45 wpm)

IC Data base News Bulletin (Part 1)
IC Data base News Bulletin (Part 2)
IC Data base News Bulletin (Part 3)

The web page address is:

<http://www.rac.ca/cwnews.htm>

- . . . -

THE MARC COMPUTER NET

For those of you who still don't know, the Montreal Amateur Radio Club has a new net. In an effort to bring something back to the MARC (and on a suggestion from Sheldon VE2SHW), the MARC Computer Net started up a few weeks ago, mostly as an informal net. The problem of course is that this isn't a "lecture net" as much as it is a discussion net, and I need people to discuss with. So for those of you who have computer problems of any type, favorite websites you'd like everyone to know about, a hot internet topic that you're just dying to discuss, or you're a computer expert and want to help others, come by the net and check in.

The computer net is on VE2RED (147.270+) Thursday nights at 7:00pm. The net usually lasts an hour but I certainly won't silence anyone who still wants to discuss something. Anyone with traffic for the net can send it via email to va2smf@rac.ca

73 de Steven, VA2SMF

SCANNERS HEAR IT FIRST

BY FREDERICK HART

Roarrrrr, or is it Baa, Baa? March eh? In like a lamb and out like a lion or is it vice versa? In this house I'm out voted by two furry votes to one so it's meow!! on both counts. It's another month and winter won't go away and even the groundhog is dead. (Can a dead rodent's corpse still cast a shadow?)

Have you heard much on your scanners lately? I hope this information in this column helps out with the new frequencies and explanations to help you understand some of the gibberish you might hear. For new scanner enthusiasts, don't dismay. It will come about that you will become accustomed to the codes and frequencies so you will be able to listen and not look at the scanner to see what service is squawking or have to go through the 10-code list to understand what is being said on the air. It will take a lot of time but eventually you will be able to figure things out without too much trouble. It would be so much easier if

everyone used the same 10-codes but that is unrealistic given in the Montreal Urban Community that we have 1 Regional Government, 28 Municipalities, two Police Forces, one Ambulance Service and 27 Fire Departments using different codes and vehicle numbering schemes.

In a certain circle of people (yours truly included), multiple radio monitoring is a sixth sense. I can remember my Journal de Montreal Photographer friend, Andre Bonin with his shelving unit in the back seat of his vehicle with three rows of three 20 channel tabletop (Bearcat 210's) all chattering at once. To put it all in one, it would not work because as you stop to scan one incident, you would miss the other. Even with the priority on, you only get two. Many members of the mobile news media use the multiple radio setup (at least the good media types - CBC/TVA). Someone who has never encountered this type of monitoring would not last 5 minutes in a vehicle with squawking like that. "You've gotta be crazy to listen to all of that all at the same time!!" many newbie scanner listeners have said. During my years on the ambulance, I would read, listen to dispatch, a police chase, a major fire and the amateur bands all at the same time as well as music on the FM broadcast radio, usually not missing a thing while keeping a tune in my head (and I wonder why my mind is mush now). Good listening, get an earful and I'll see you next month.

Fred's Notes

Des Seigneuries - 410.2375 (St. Lazare, St. Clet, Coteau de Lac and Les Cedres) Many thanks to Ken, VE2EXC for some local frequency searching to find the ever evasive Police chatter in the region. (Usually Quiet but then steal an Armoured Car and they come out of woodwork!!!!).

Note 149.170 Pagers 412.8125 Mutual Aid Voice - Upper Richelieu Valley Fire Services (La Prairie, Delson, St. Constant, Candiac, Ville Ste Catherine and down Autoroute 15 to Lacolle).

Key Scanning Sites on the Internet:

www.strongsignals.net - A very informative site on the net for data on certain scanners. Vast list of models and makes with many field test reports.

www.wildstar.net/~plaws/scan/ - Known to many as Peter's Scanner Page and is a very good site for frequencies of many regions. Peter Laws, N5UWY is a former EMS/Ambulance colleague of mine and is spoon-fed via

e-mail updates of the various Montreal area emergency services and has been known to come back from time to time to check up on various things on his own.

Frequency Quick Picks

For those looking for local EMS/Fire/Rescue/Media traffic in English (A rare breed).

- 411.8375 Cote. St. Luc Emergency Medical Services (EMS)
- 155.730 Montreal West Fire Department/Rescue/EMS
- 155.370 Roxboro Fire/Rescue
- 413.4875 Westmount Fire/rescue/EMS
- 413.2125 Hampstead Fire/rescue/EMS
- 159.120 Kahnawake Fire Brigade/Ambulance Service
- 411.9875 Kahnawake Mohawk Peacekeepers (Depending on your location, you may hear other services in French on this frequency)
- 154.160 Southwest Mutual Aid Fire Association
- 153.875 Clinton County (New York) Fire/Rescue/EMS pager
- 155.820 Franklin County (Vermont) Fire/Rescue/EMS
- Dispatch/pager
- 458.3625 CIQC - Traffic Airplane
- 162.330 CJAD - Traffic Helicopter
- 450.875 Pulse (Ch-12) News

* Brand new find * - IQC/Q-92 Traffic Plane 458.3675

COMMUNITY SERVICE

ST LAZARE - HUDSON AREA

UPCOMING 1999 EVENTS ORGANIZED BY VE2EXC

If anyone else would like to join the team, please contact Ken VE2EXC via: the Covey Hill swap net (VE2REX 146.685) on Friday evenings at 8:00, by phone (450) 458-7447, or by e-mail: kmagee@hudson.net.
(Note: all but Cyclo-Tour are equestrian events)

The North American Selection Trials for the World Singles & Pairs Combined Carriage Driving
Date: 22 May 1999 Saturday - New Date
Location: Windedge Farm, Ste-Justine de Newton, QC
16 to 18 km cross country event - minimum of 22 amateur radio operators will be required.

St. Lazare Cyclo -Tour
Date: 30 May 1999 Location: St. Lazare, QC
From 1000 to 1500 or more cyclists (30 km course).
The Harmony Horse Trails
Date: 20 June 1999

Location: Windedge Farm, Ste-Justine de Newton, QC

Marathon Course Combined Driving Event
Date: 28 August 1999
Location: Sandridge Farm, St. Lazare, QC

Pleasure Driving Event
Date: 2 October 1999
Location: Windedge Farm, Ste-Justine de Newton, QC

As we have reported earlier, the first communication event is on for May 22nd (all day Saturday) its a Combined horse carriage driving event (17 km long) held at the Windedge Farms. (Location is 25 mi. N/W of Montreal)(Directions and talk-in provided to all volunteers). This event is a qualifying event for the Canadian national carriage driving event and promises to be very exiting. We are going to be posted all around this long course providing point to point information as to what and where is happening, and relaying vital information to the control station on the safety and well being of the competitors.

We require 2M portable units as well as 2M mobile vehicles, so let me know what you have available, portables must be able to operate for at least 8 to 10 hrs. We are going to be using a Simplex and/or a repeater frequency for the event.

Rain or shine we are there, bring your lunch, light portable chair, and rain or shine gear. Over the last many years many of have been participating in this wonderful communications exercise, and we would be more than pleased to have you along.
